Re: Notice of No Further Action
15A NCAC 2L .0407(d)
Risk-based Assessment and Corrective Action for
Petroleum Underground Storage Tanks

Beaufort Regional Hospital
USTs 1-7
628 E. 12th Street, Washington, NC
Beaufort County
Incident Numbers: 38182, 38183, 38184, & 38185
Risk Classification: Low

Dear Sirs:

The Limited Site Assessment Report/Site Closure Request received by the UST Section, Division of Waste Management, Washington Regional Office on **October 27, 2011** and the public notice/filed Notice of Residual Petroleum Contamination received on **November 19, 2015** have been reviewed. The review indicates that groundwater contamination meets the cleanup requirements for a low-risk site but exceeds the groundwater quality standards established in Title 15A NCAC 2L .0202 and that soil contamination exceeds the residential maximum soil contaminant concentrations.

The UST Section determines that no further action is warranted for this incident. All required actions have been completed. On **November 19, 2015**, the UST Section received a certified copy of the Notice of Residual Petroleum which is filed with the Register of Deeds. On **November 19, 2015**, the UST Section was provided with proof of receipt of the conditional Notice of No Further Action letter or of refusal by the addressee to accept delivery of the letter or with a description of the manner in which the letter was posted.

This determination shall apply unless the UST Section later finds that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment. Pursuant to Title 15A NCAC 2L .0407(a) you have a continuing obligation to notify the Department of any changes that might affect the risk or land use classifications that have been assigned.

Nothing Compares™

State of North Carolina | Environmental Quality
1601 Mail Service Center | Raleigh, North Carolina 27699-1601
919-707-8600

Be advised that as groundwater contamination exceeds the groundwater quality standards established in Title 15A NCAC 2L .0202, groundwater within the area of contamination or within the area where groundwater contamination is expected to migrate is not suitable for use as a water supply.

Interested parties may examine the file/ Site Closure Request by contacting this regional office and may submit comments on the site to the regional office at the address or telephone number listed below.

This No Further Action determination applies only to the subject incident; for any other incidents at the subject site, the responsible party must continue to address contamination as required.

If you have any questions regarding this notice, please contact me at the address or telephone number listed below.

Sincerely,

Scott Bullock, L.G.

Regional UST Supervisor

Washington Regional Office
